

CONSTANT CURRENT AND TRADITIONAL TRANSFORMERS

Types C, CE, and EE

- Extreme durability
- 50 Hz and 60 Hz models available
- 60 Hz model designed especially for cruise ships
- Constant Current models simplify the neon tube designing
- Earth Leakage protection in EE and CE models with an external unit
- Vacuum moulded to reduce noise and vibration
- Easy installation directly to a metal surface
- Small size and weight
- Fullfills EN and IEC regulations

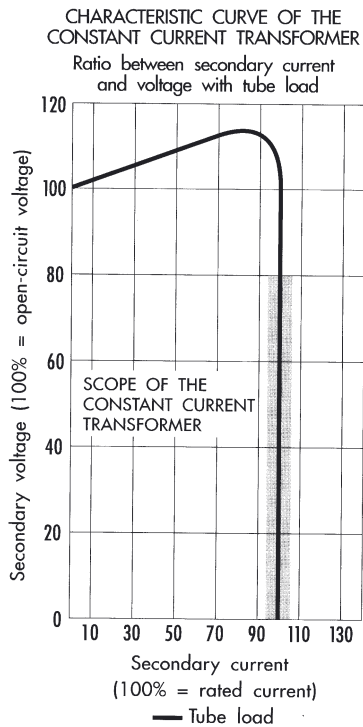

Where competition is as toughest, the manufacturer with the most advanced product has an advantage. Neoncomp product development is based on extensive know-how in neon light technology. Neoncomp is the only manufacturer of neon transformers in the Nordic countries. Since 1956 we have manufactured compact high-voltage transformers and lighting components for use in the harsh Nordic environment. Neoncomp has been certified for the ISO 9001 and ISO 14001 quality standards. The quality of our products is based on the expertise of our employees, excellent means of production, a careful selection of raw materials and thorough quality testing.

Types C, CE, and EE
